

STEP SH3F-1-400 Single Bin Weighing Bagging Machine

Description

Semi-automatic weighing and bagging machine with a single hopper, designed for precise filling of bags from 20 to 50 kg. The machine comes with electronic controls and a user-friendly display, ideal for industries such as agriculture, animal feed, chemicals, and construction materials.

Features

1. **Precise Weighing:** $\pm 0.2\%$ accuracy minimizes material waste.
2. **High Throughput:** Up to 450 bags per hour.
3. **Flexible Power Options:** Compatible with different regional standards.
4. **User-Friendly Operation:** Easy control via computer interface.
5. **Robust Design:** Built to withstand industrial environments.

Key Product Benefits

1. **Reliable and Accurate:** Consistent performance for high-volume production.
2. **Time-Saving:** Reduces manual handling and improves efficiency.
3. **Scalable Solution:** Suitable for automation and future expansion.

Applications

Suitable for:

- Agriculture (grains, seeds, fertilizers)
- Animal Feed (powder and pellets)
- Chemicals (granules and powders)
- Construction Materials (cement, sand)

Ideal for medium to high-volume bagging operations requiring precision and speed

Specifications	
Model	STEP SH3F-1-400
Power supply	380V/50Hz/3 phase, 220V/50Hz/1 phase
Weighing Scope	20–50kg per bag
Output Capacity	300–450 bags/hour
Precision	$\pm 0.2\%FS$
Weight	800kg
STEP Item No.	48261400
