

STEP Mobile Stand with Independent Power Supply

The **STEP Mobile Stand** is a versatile and independently powered workstation designed for efficient handling of large shipments and pallets. Ideal for warehouses, temporary workspaces, and areas without electrical installations, this mobile desk solution enhances workflow speed and operational flexibility. The built-in **LiFePO4 battery system** ensures uninterrupted power supply, making it invaluable during power failures.

Machine Features:

- Moveable desk solution for warehouse operations
- Independent power supply with LiFePO4 battery (12V, 100Ah)
- High-performance inverter providing 230V AC output
- Visual battery charge indicator for easy monitoring
- Compliant with LVD Directive (2014/35/EU) for safety and protection

Specification	
Model	STEP Mobile Stand with Independent Power Supply
Battery Type	LiFePO4 (12V DC, 100Ah) with Bluetooth app communication
Inverter Output	230V AC, 600W continuous, 1200W peak (optional: 1000/2000W)
Battery Charge Indicator	Visual charge level display
Safety Compliance	Full set of protections, LVD 2014/35/EU compliant
Battery Life	Several days of usage per charge, depending on load
Item Number	25009010

Can be adapted for UK 230V outlets and USA 110V outlets upon request:
