

STEP K-40H18 Carton Forming and Bottom Sealing

Machine is a former and sealer of corrugated boxes. Difference from STEP K-40 is the added output per minute - measured as 18 boxes/min. This is innovatively designed to cater medium to large scale businesses that has high demand on box processing. Lightweight compared to other machines of same output in the market and is proven excellent when it comes to performance.

Features:

- High Standard Materials: Electrical and pneumatic parts are imported and of high standard quality
- Easy Feeding of Cartons: Cartons may be added without stopping machine operation, eliminating downtime
- Forming and Sealing: Applicable for forming and sealing cartons of same sizes
- Adjustable Carton Size: Manual modification to change carton size, finishing in 2 to 3 minutes
- Photoelectricity Induction Control System
- Safety System: Cutter is safe for use, and injuries from stabs are prevented
- Durable and Compact Built: Reduces waste of time as machine forms, folds, and seals simultaneously
- Vertical Storage
- Lightweight
- Speed
- Quality Performance

SPECIFICATIONS:	
Dimension (LWH)	2400mm x 2050mm x 200mm
Adhesive Tape	48/60/75mm
Weight	550kg
Model	STEP K-40H18
Packaging Size (LWH)	200-400mm x 150-350mm x 100-350mm
Speed	18 cartons per minute
Power Supply	220V 50Hz 200W with Siemens Plug or Request for Other Voltage Version
Air Compression	6kg/cm ³
Air Consumption	450NL/minute
STEP Item No.	42121020
