

## STEP MHWLB

STEP MHWLB is suitable for weighing large block, strip and stem materials with poor fluidity, such as fish, noodles, shrimp, meat products, medicinal materials and other aquatic products. Belt-type open weighing tray design structure can effectively solve the feeding of the sticky or bulky materials with poor fluidity.

Features:

- Using high-precision, high-standard special load cell.
- Accurate Weighing.
- Intelligent fault alarm.
- High Speed Running.
- Intelligently customize the number of weighing trays to achieve double standards of weighing and counting.
- Easy to operate by workshop staff.
- Visualize LED signal light, clear the feeding direction and feeding area, and effectively identify the current status of the corresponding tray.

| Specification Details   |                             |                             |
|-------------------------|-----------------------------|-----------------------------|
| Model                   | STEP MHWLB-12-60            | STEP MHWLB-14-60            |
| Item Number             | 48291260                    | 48291460                    |
| Weighing Range          | 10-6000g                    | 10-6000g                    |
| Accuracy                | X (0.5)                     | X (0.5)                     |
| Max Speed               | 30 P/M                      | 25 P/M                      |
| Level of Protection     | IP 65                       |                             |
| Weighing Belt Dimension | 300 (L) x 180 (W)           |                             |
| Control Panel           | 10.1 Touch Screen           |                             |
| Driving System          | Step Motor                  |                             |
| Power Requirement       | 220V/ 800W/50/60Hz/ 3.6A    |                             |
| Packing Dimension (mm)  | 2200(L) x 1200(W) x 1160(H) | 2560(L) x 1200(W) x 1160(H) |
| Gross Weight            | 370kg                       | 450kg                       |
