

STEP TP-602MV Semi-Auto Pallet Strapping Machine

12mm Strap

Description

The STEP TP-602MV is a semi-automatic pallet strapping machine designed for securing large and heavy loads with 12mm PP strapping. It combines user-friendly operation with robust functionality, making it an ideal solution for warehouse and logistics operations that require efficient pallet securing without full automation.

Key Features

- Compatible with 12mm PP strapping
- User-friendly operation with foot pedal activation
- Adjustable strapping tension
- Mobile and compact design
- Open-frame table for handling large pallet loads
- Easy maintenance and servicing

Benefits

- Cost-effective solution for semi-automatic pallet strapping
- Improves packaging productivity and load stability
- Flexible for various pallet sizes and applications
- Suitable for small-to-medium production volumes

Applications

- Pallet strapping in distribution centres
- Securing bulk cartons and boxes
- Warehousing and logistics operations
- Export packing areas
