

# Elastic String AR3POLV type Triple Core thread

## Description

The **Elastic String AR3POLV type Triple Core thread** is a high-performance, eco-conscious elastic string made of **natural rubber and polyester**, designed for bundling in the **agriculture, food, and industrial sectors**. Featuring **3-core latex construction** and **+200% elongation**, this string provides both flexibility and strength.

It is **certified for food contact**, ensuring safety for packaging edible goods. With its biodegradable composition and robust structure, AR1COTV supports sustainable operations without compromising performance.

## Key Features

- Biodegradable and food-safe
- High elasticity with +200% elongation
- 3-core natural rubber strength
- European quality production
- Ideal for manual or automated tying

## Benefits

- **Sustainability Focused:** Reduces environmental impact through biodegradable materials.
- **Safe for Food Use:** Complies with food contact regulations for direct packaging applications.
- **Operational Efficiency:** Easy to handle and stretch, reducing time and effort in tying processes.
- **Versatile Usage:** Suitable for various products—rigid, flexible, large, or small.
- **Consistent Performance:** Maintains elasticity and strength over time when stored properly.

## Applications

- Fruits and vegetables
- Flower bouquets
- Meat packaging
- Industrial bundling

Specifications	
Composition	Natural rubber 64.8%, Polyester 35.2%
Free Length per Spool	518 meters
Max Elongated Length	1554 meters (+200%)
Weight per Spool	1 kg
Food Contact Approved	Yes (DCCA-AR3POLV compliant)
Item Number	56033000
