

STEP LSI 90 (175/250) String Tiers Series

Description

The STEP LSI 90 (175/250) is a compact and reliable string tying machine ideal for use in both manual and automatic setups. Engineered for performance and versatility, it wraps, tightens, and knots elastic or synthetic string (raffia) around items of various sizes and shapes. Perfect for bundling vegetables, herbs, flowers, wires, fabrics, and more, this machine provides consistent results without damaging the product.

Key Features

- Uses elastic or synthetic raffia string
- Electric operation with no knot diameter limit
- Patented tying mechanism for reduced string waste
- Compact, user-friendly, and easy to maintain
- Gentle tying that preserves product quality

Benefits

- Versatile – Suitable for agricultural, industrial, and general packaging
- Clean – No glue or heat needed, gentle on products
- Efficient – Speeds up bundling process
- Durable – Built for continuous use
- Flexible – Works with irregular shapes and sizes

Applications

- Vegetable and herb bundling
- Cut flowers and plant tying
- Electrical wires and cable bundling
- Fabric and textile rolls
- Letters, mailers, and lightweight goods

Specifications	
Binding Material	Elastic or synthetic string (raffia)
Operation Mode	Electric
Knot Diameter	No restriction
Application Type	Manual and automatic tying
Item Number	32201100
